**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-9 and 11-28 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 2 and 13.

Specifically regarding claim 1, Okada et al. (20020089612) teaches the state of the art of an optical modulator.

But, Okada et al. fails to explicitly teach a bent rib bent toward the inside of the holding frame is formed on a distal end of the lateral portion of the holding frame, as claimed.

Specifically regarding claim 2, Okada et al. (20020089612) teaches the state of the art of an optical modulator.

But, Okada et al. fails to explicitly teach the frame member having a pair of bent portions formed at a position opposing the pair of lateral portions, the lateral portions and the bent portions being abutted and bonded, as claimed.

Specifically regarding claim 13, Okada et al. (20020089612) teaches the state of the art of an optical modulator.

Art Unit: 2873

But, Okada et al. fails to explicitly teach a base made of heat-conductive material fixed on at least one of sides of the color synthesizing optical device and an optical converter interposed between the optical modulator and the light-incident side, the optical converter having an end attached to the base and an optical conversion film provided on the substrate, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
